

User Guidelines (8 pages)

Normally the ARC Research office maintains the reports found in this PDF document as a hard copy workbook from which enrollment and student performance data elements are selected for use in the Key Effectiveness and Institutional Effectiveness Reports among others that support evaluation and planning activities at ARC.

To display the bookmarks for these reports, select the bookmark icon at left of the PDF document page (second icon from top). To move to any report listed, left click the bookmark with the mouse. Then click on the document and use the page up or down keys or the mouse on the right hand scroll bar to navigate through the document. You can resize the document window to change the size of the reports by increasing PDF document window size. You can quickly find a specific demographic by selecting Ctrl + f (Find) and enter the demographic in the space allocated in the Find menu bar such as ETHNICITY. Because each variable also has a number, e.g., (10) that precedes the demographic variable, the number can be used alone within each report with the find function. All the demographic variables (with the numbers) are found for each report section in the latter part of this document. Be sure to include the parenthesis (10) with the number.

Printing: Each individual enrollment section can be printed by specifying the page range, or by right clicking the desired bookmark and select the “print page(s)”. Only the selected bookmark section will be printed. **Caution:** *Because of the large size of some of the reports, use caution in printing the sections indicated by the page marks.* It is recommended that you print this Guideline document (8 pages) and use it as a reference for navigating the large amount of data that has been provided. The total number of pages in the overall PDF document is listed in the menu bar, and represents all the workbook data elements that are normally maintained in the ARC Research Office.

For additional support: ARC Research Office: Jim Barr (8846), Cathie Browning (8679)

The following reports are listed as primary bookmarks.

ARC Overall Reports

The overall reports describe data for the ARC System over the past five years to provide a view of student enrollment and performance across 51 demographics. The following will expand on each additional report contained in the PDF document.

ARC Enrollments for Five Academic Years

This section examines the unduplicated student counts and course enrollment changes over the past five academic years (2002-2003 to 2006-2007) for the entire ARC System. Overall, 51 student demographics are shown, with most having both the unduplicated student counts and course enrollment counts along with the percents that the counts represent. The shaded row in a report will provide a number, which will correspond to the demography data list number shown for each report in the later part of this document, the category of the demographic, and will indicate whether the data is an *unduplicated (student) count* or the number of *course enrollments by Acad Year or Term*. The main body of the table will show the count and the percentage values (within each academic year or term) for the named demographic. For example in the **ARC Enrollments for Five Academic Years** report, (3) **CENTERS [Undup Enrollments by Acad Year]** (**xcenter**), describes the unduplicated counts and percent within each academic year for each ARC Campus Location, (ARC Main, Natomas, Ethan Way, etc.). The values under the column 2002-2003 indicate that the ARC Main campus had 39,290 unduplicated students which represented 73.33% of all unduplicated students in the ARC System. The next section of the report (4) **CENTERS [Course Enrollments by Acad Year]** (**xcenter**) describes the count and percent of course enrollments for each center. If you divided the number of unduplicated student counts into the number of course enrollments, you would find the average number of

courses students enrolled in at each center. The last column in this report indicates the percentage change over five years for each demographic.

ARC Enrollments for 15 Terms

This section examines the same data elements as above (51 demographics), but examines the data by 15 terms. For example, it is relevant to examine individual term data for first-time freshmen, as the majority of first-time freshmen begin in fall, a fact that would be masked in an academic year analysis. Training Center enrollments surge in spring, reflecting a period of increased fire safety course offerings corresponding to the summer fire season.

ARC Student Success over Five Academic Years

This section examines the grade distribution, (the percent of individual grade notations awarded) and the success and retention rate for 32 demographics over the past five academic years. The success rate describes the percentage of A, B, C, and Cr grade notations, where the retention rate describes the percentage of A, B, C, Cr, D, and I grade notations. Generally, retention rate has implied the number of students who remain in the course throughout the semester, and because of the additional grade notations in the numerator, the percentages will be somewhat higher than for success rate. Both the count and percentage are shown in the main table for each demographic.

ARC Student Success over Five Individual Academic Years

This section examines the success rate by the same set of demographics as in section # 3 above, but does so by describing the success rate for five individual academic years to provide a trend analysis for demographics.

All Campus Locations

The campus location reports were designed to provide separate enrollment and student success reports for each of the ARC System campus locations (ARC Main campus, the Natomas, Ethan Way, McClellan, San Juan (was Sunrise), Mather and Training Centers) to better support evaluation and planning efforts at each location.

Center Enrollments for Five Academic Years

This section describes the unduplicated and course enrollment pattern over five academic years for each campus location in the ARC System. The unduplicated and course enrollment counts and percents are examined for each campus location. 50 demographics are examined in the individual campus location reports listed under this category.

Center Enrollments for 15 Terms

This section describes the unduplicated and course enrollment pattern over 15 terms for each campus location in the ARC System. The unduplicated and course enrollment counts and percents are examined for each campus location. 50 demographics are examined in the individual campus location reports listed under this category.

Center Student Success over Five Years

This section examines the grade distribution, (the percent of individual grade notations awarded) and the success and retention rate over the past five academic years for each campus location. The success rate describes the percentage of A, B, C, and Cr grade notations, where the retention rate reflects the percentage of A, B, C, Cr, D, and I grade notations. Generally, retention rate has implied the number of students who remain in the course throughout the semester, and because of the additional grade notations in the numerator, the percentages will be somewhat higher than for success rate. 29 demographics are examined in the individual campus location reports listed under this category.

Guide for locating demographic variables in the Reports

Each demographic in the reports has a number shown in the shaded row (1) that will correspond to the number listed for each the demographics listed under the report name. Using these numbers is not necessary to understand the reports, yet have been included to allow users to quickly find a demographic data element of interest for a specific report in the lists that follow. By selecting Ctrl+f, or entering the demographic variable FRESHMEN or the number (10) with the parenthesis in the Find location on the menu bar, you can quickly locate the variable in the selected report.
