

User Guide Program Review: Sections and Average Class Size

The ARC Research office provides a wide range of reports to support the program review process, and the reports in this pdf explore the number of sections and average class size over the past five years, by the college, centers, area, discipline, and individual course. This pdf does not include the individual discipline reports which are distributed to programs in the review cycle that can also be requested through the Research Office.

The following are listed as **Primary Bookmarks: Subcategories indicated by a “+”**

Report	Comments
User Guide	Provides overview of all reports
1. Summary Centers	The summary reports describe the number of sections and average class size by the college centers, areas, and disciplines.
2. Summary Areas	
3. Summary Disciplines	
4. Centers	Each report will describe the number of sections offered for the time period shown and the average class size. The trends over the most recent five year period provide a summary of classroom activity through a variety of views at the College level, Area, Discipline, Course, and by individual centers. In some reports, 15 individual terms are broken out by Day, Evening, Weekend, and Online over five years to further clarify trends that have emerged. These reports provide a sensitive index to changing patterns of enrollment that can inform planning processes of future trends.
